

Kantech Helm

Mobile Security Platform

KANTECH

A Tyco International Company

Kantech Helm

Smartphone

For iPhone, iPod Touch and Android Powered Phones.

Kantech Helm puts you in control of your security. It enables you to interact with the EntraPass[†] security management software using only a few taps on your mobile device. The easy-to-use mobile app gives you anytime, anywhere real-time management of over 20 security tasks. Manage/create cards, lock/unlock doors, request reports and much more. Our state-of-the-art smartphone apps are designed specifically for each operating system.

Download Kantech Helm from the App Store or the Android Market to get security on the go!

Executive Problem, Simple Solution

Imagine that your company President brings an important client to the office on the weekend. He just came from a golf game and does not have his access card with him. Though the security system administrator is at the beach, it is easy to open the office door and grant the President access. It's simply a matter of starting the Kantech Helm application and unlocking the front door. Just long enough for the President and client to get inside and get down to business. While the administrator gets back to the beach. ***It's that easy and that fast.***

[†] Kantech Helm is compatible with the latest build of EntraPass v5.01 and higher.

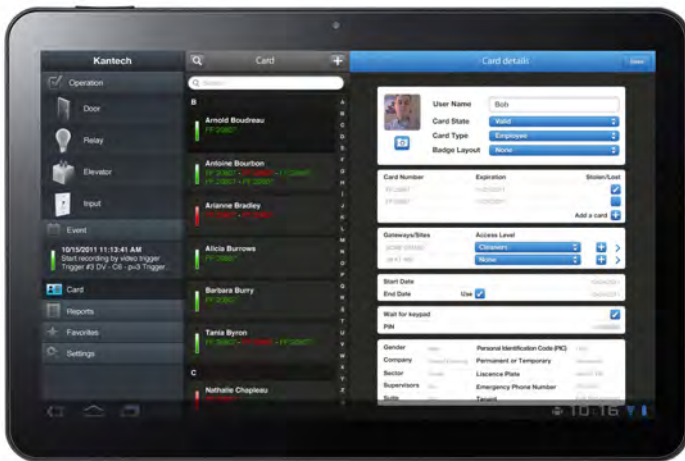

Tablet

For iPad and Android Powered Tablets.

The Kantech Helm platform is designed with scalability in mind. From 4 doors to multi-site enterprise scale applications, Kantech Helm grows with your needs. And it goes where you go. It gives you the tools to monitor and control the EntraPass powered security system in real-time from anywhere.

Download Kantech Helm from the App Store or Android Market and put security in your hands.

Security on the Go

Security on the Go

Interact with your EntraPass security software with only a few taps on your mobile device.
Kantech Helm gives you security on the go!
